

HyFlex® Ultra-Lite

11-618

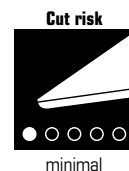

General-purpose
knitted and
dipped glove

An ultra-lightweight glove
maximising touch and precision

Ansell's HyFlex® Ultra-Lite 11-618 is a new, thinner glove that offers outstanding comfort and sensitivity for the most delicate handling. The lightest lined and coated glove ever made by Ansell, HyFlex® Ultra-Lite is 20% lighter in weight than Ansell's previous nylon/polyurethane gloves. Designed for a wide range of lightweight

applications in dry or slightly oily environments, it is ideal for workers who need a higher level of touch and precision than that offered by their current gloves. Also ideal for applications where cotton gloves or no gloves at all are used despite the risk of scrapes, blisters and minor injuries.

Ansell

Recommended usage

Light assembly applications requiring a high degree of precision, for example picking/fitting small pieces such as small bearings and springs. Used also in control areas. For:

- automotive (Final assembly, airco, electrical engines, wire harness assembly, adjusters work)
- white goods and electrical goods
- cosmetics/plastics (also packaging stage)

Tactility and precision never before achieved

Made of a nylon liner and a polyurethane coating, the HyFlex® Ultra-Lite 11-618 is the lightest glove with a liner and coating ever made by Ansell. It is some 20% lighter in weight than previous polyurethane/nylon Ansell gloves. Using new production techniques, the Ultra-Lite glove is just 0.8 mm thick in total. It also offers good grip in dry or slightly oily conditions. For your workers, these exclusive features mean outstanding sensitivity and performance in even the smallest picking applications.

Comfort and protection

The flexibility of HyFlex Ultra-Lite's liner and coating provides high comfort levels over extended periods. This, together with its light weight, optimises workers' acceptance. In terms of protection, the glove shows an EN level 3 for abrasion resistance and 1 for cuts, which gives it high standards for its thinness and lightness.

General-purpose knitted and dipped glove

Durability

The glove's resistance levels make it also durable. In addition, the dark blue liner and black coating make the glove well-suited for environments that present a certain degree of dirt.

Specifications

Ref.	Type	Style	EN Size	Length	Colour
11-618	Palm-coated, knitted and dipped glove	Stretch nylon liner	6, 7, 8, 9, 10, 11	210 - 245 mm	Dark blue/black

Packaging

12 pairs per polybag, 12 polybags per carton
