

Controlling TFTs without Graphic-Controller

Easy & Cost optimized

Visu RDK H8SX

Reference Design Kit from MSC: Visualisation using Renesas H8SX/1668

Fast low-cost migration to full color graphics

- single-chip solution using a flash microcontroller
- no additional graphic controller

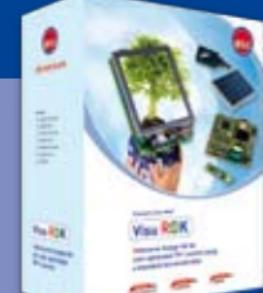

Software reference implementations:

- Segger emWin demo
- iniNet SpiderControl demo

Test now:

VISURDK-H8SX-VGA

H8SX/1668, 50 MHz, 1 MB FLASH,
2MB SRAM, 8 MB SDRAM,
USB, Ethernet (on-board), TFT,
JTAG-debugger, software, documentation.
