SimpleID
for HID[®] 

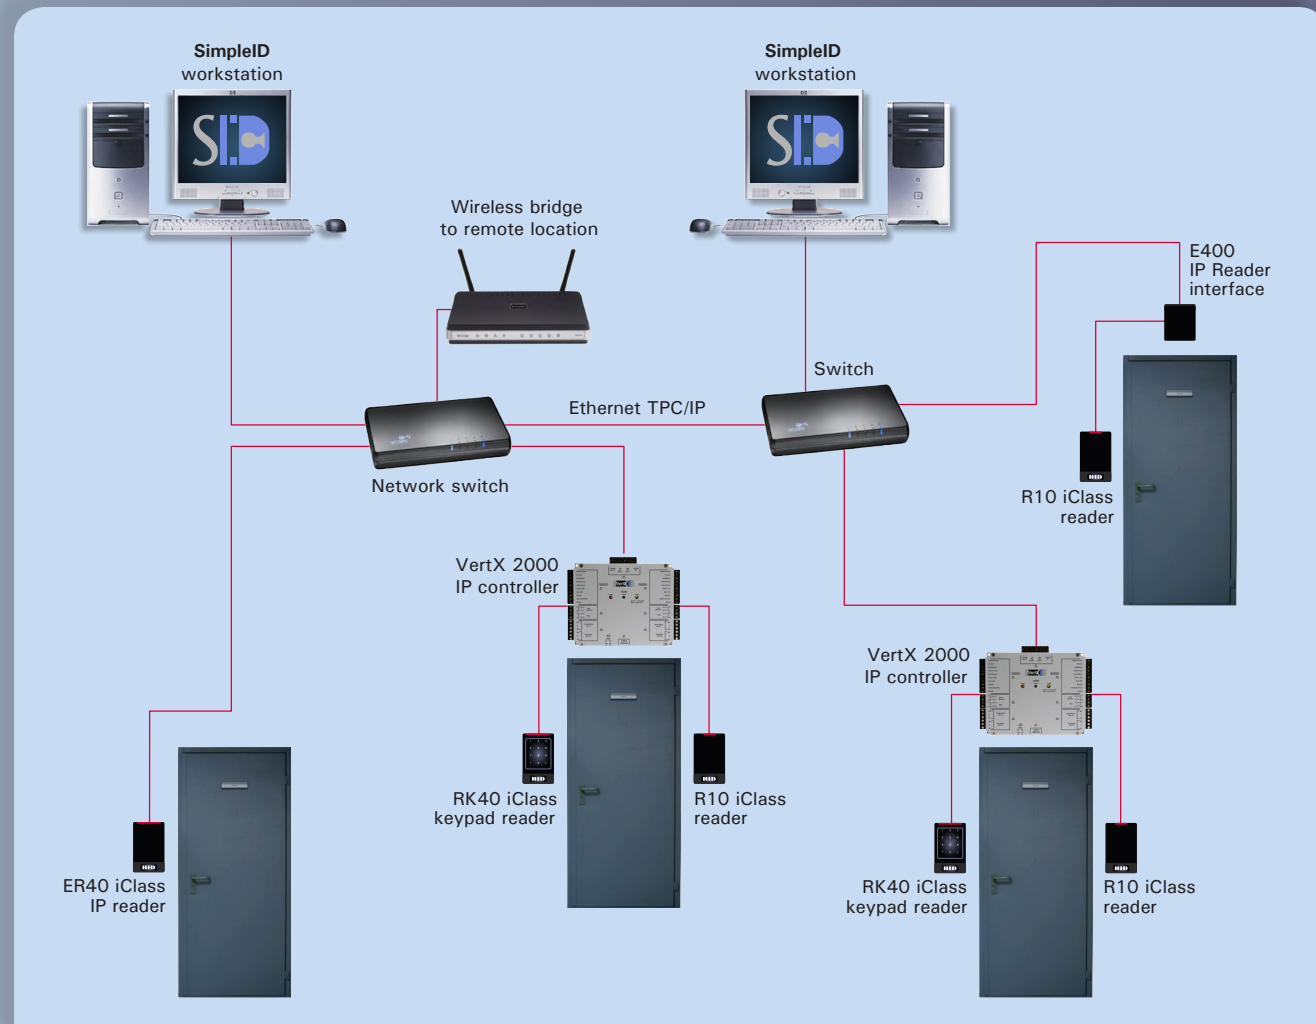

SIMPLE AND EASY-TO-USE ACCESS CONTROL SOFTWARE

SimpleID software unlocks the power of the most advanced access control hardware currently available in the industry: HID VertX controller and Edge IP reader. By combining the unique benefits of the new generation readers and controllers with user-friendly graphic interface, **SimpleID** provides an ideal solution for IT-driven security projects.

What makes SimpleID different?

- Minimal training requirements for end-user
- Minimal training requirements for technicians
- Minimum maintenance
- Minimal installation costs
- **Maximum profit for distributors and installers**

This set of 5 M's provides tangible benefits for security installers, dealers and integrators who seek competitive advantages in the security market.

QUICK FACTS:

Unlimited PC workstations
250,000 users per controller
44,000 users per IP reader/interface
65,535 access groups per controller
8 access groups per user
255 time schedules per controller
6 intervals per time schedule
4000 holidays

SimpleID benefits

Superior monitoring features: XAML animation, clear icons, vector graphics, real-time events on the maps

Impressive scalability: start from just one IP reader and expand the system to hundreds of readers distributed all over the LAN/WAN.

Worry-free usage: scheduled automatic database sweep and backup

Single-click system updates: software automatically detects and upgrades the existing installation and database.

"Push" technology: events are not polled. Instead they are pushed by IP reader/controller, which means they are displayed without any delays.

Extensive reports: time & attendance, settings, users, events, access levels [YourBrandName]tm: SimpleID supports skins what makes it easy for installers and integrators to add their own look and feel to the software.

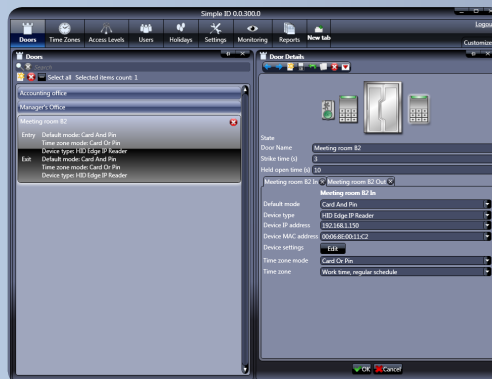

Multilingual GUI: built-in translation tool allows translating or correcting the user interface text on the fly. All languages are supported.

Clear an intuitive: Any IT specialist can have the system configured and running in less than 15 minutes simply by following easy step-by-step instructions.

No experience in security necessary!

Unleash the power of VertX and Edge: pure IP system, high-speed communications, Power-over-Ethernet, reduced wiring, fault-tolerance and much more...

Door Settings

Supported hardware:

HID VertXTM V2000 2-door network controller, EdgeReader ERP40 multiCLASSTM and ER40 iClassTM IP readers, E400 1-door network controller, Suprema BioEntry Plus and BioStation fingerprint IP readers.

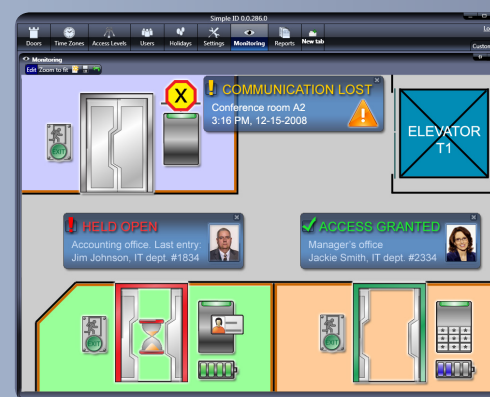

Time Schedule Configuration

User Management

Live Event Monitoring

System Requirements:

Intel Pentium IV 2Ghz, AMD Athlon 2500 + or better
ATI Radeon HD 4800, nVidia 8500GT, or other
DirectX 10-capable graphics card
1 Gb RAM
MS Windows XP/Vista
MS SQL Express Database
MS .Net Framework v2.0, v3.0 v3.5 and v3.5SP1

About T-Rex

Established in 2005 with headquarters in Vilnius, Lithuania, T-Rex Inc. is an innovative provider of high-technology solutions for the security industry. By focusing on usability and design of new intelligent operator interface, T-Rex is taking security solutions to a new level.
