Water-based polyurethane multi-purpose glove with enhanced comfort

Ansell extends its HyFlex® multi-purpose range of gloves with the water-based polyurethane HyFlex® 11-400 & 11-401. Thanks to the water-based polyurethane, users benefit from enhanced comfort with the renowned dexterity and fit of the HyFlex® range.

Ansell

HyFlex® 11-400 & 11-401

Water-based polyurethane multi-purpose glove with enhanced comfort

Applications

Multi-purpose applications such as general handling, packaging and delicate manipulation, in the following industries:

- Automotive
- Metal
- Machinery & equipment
- Building & construction
- Logistics

Water-based polyurethane

The new, water-based polyurethane HyFlex® gloves are a radical leap forward in long-term safety and care for the environment.

Using water instead of dimethyl-formamide solvent in the manufacture of polyurethane gloves increases the safety of Ansell workers. Furthermore, it results in much more environmentally friendly manufacturing. Finally, our customers also benefit from this manufacturing technique: water-based polyurethane enhances the dexterity and comfort of the glove, as the polyurethane doesn't penetrate inside it.

Enhanced comfort

- There is no polyurethane penetration through the glove liner, so it is softer on the skin.
- The seamless glove offers very good fit, dexterity and flexibility.
- Excellent breathability thanks to:
 - Coated palm for protection.
 - Coating-free back of glove for enhanced flexibility.

Cost efficient

Improved wear life due to abrasion resistance level 4 for HyFlex® 11-401 and level 3 for HyFlex® 11-400.

Available in white and black

- HyFlex® 11-400 white – for handling non-cut, small/medium dry objects where dirt needs to be immediately visible.
- HyFlex® 11-401 black – for handling non-cut, small/medium dry objects where dirt should be masked.
