with unlimited networking options. Pricing will vary.

VICONNET 6.6

ViconNet 6.6 offers all the features of Vicon's industry-leading, open platform video management software for enterprise-scale installations, now priced for small and medium-sized pure IP systems.

Available as software only, for download through Vicon's website, or preloaded on compact and cost-effective NVRs with a range of storage options, ViconNet Jump

and ViconNet Zone pack all the high-end performance and features of ViconNet Peak for systems limited to a single NVR.

You can even integrate ViconNet Jump and ViconNet Zone with 3rd party access control software, or use them in conjunction with Vicon's sophisticated Video Matrix Display Controller.
