VISOR® Color

Vision sensor for the most precise object detection

The same or not the same?

The VISOR® Color detects even the smallest of colour nuances more reliably than the human eye. This allows, for example, the detection of colour deviations or the sorting of parts by colour.

Incorrect occupancy ruled out:

The VISOR® Color combines colour and object detection in a single device and can therefore simultaneously inspect occupancy of the blister for completeness and for occupancy with the correct colour.

HIGHLIGHTS OF THE VISOR® COLOR

- Improved object detection through additional colour information
- Powerful colour detection, even with the smallest of colour nuances or self-illuminating components
- · Powerful part finding and tracking
- Highly accurate evaluation via 1.3 megapixel colour chip
- Up to 6 digital switching outputs (another 32 with IO box)
- User-friendly configuration and viewer software with graded user rights and online help

All LEDs in the right place?

A unique performance feature of vision colour sensors is the detection of active (self-illuminating) colours. For example, displays in the automotive industry or electronic components can be inspected for correct placement with the VISOR® Color.

Colour is an important feature for detecting and differentiating between objects during the production process. Whether coloured marks in quality assurance, coloured printing or labels, LEDs or display elements, the occupancy of cable harnesses, or the browning level of baked goods – industry is much more colourful than is generally assumed.

Classic colour sensors are limited to the detection of passive colours, i.e. of object colours or coloured marks – they have to give up when confronted with self-illuminating objects. The VISOR® Color vision colour sensor from SensoPart knows no such restrictions – it not only "sees" objects of any shape and colour, but also provides additional information on colour intensity and the position of the particular object. It can also represent an alternative to conventional contrast sensors for

determining grey values and contrast differences when other object features are to be evaluated simultaneously.

The upgrade to colour is easy

The new generation of VISOR® Color vision colour sensors not only supports colour detection but also all the performance features of the VISOR® object sensor. The operating concept of the two vision sensors is identical – there are just three additional detectors for colour detection with corresponding configuration possibilities. The introductory effort for those switching from the VISOR® object sensor is thus minimal – when will you put more colours into your applications?

VISOR® Color – product overview					
	Product variant	Resolution	Focal length	Integrated illumination	Page
V20C-CO-A2-xx	Advanced	1280 x 1024 pixels	12 mm	White	82

Advanced vision sensor for object detection, colour, 12 mm

PRODUCT HIGHLIGHTS

- Object detection in colour with 1.3 mega pixel resolution
- Reliable detection of very slight colour nuances or self-illuminating components
- · Powerful part finding and tracking
- User-friendly configuration and viewer software with hierarchical user rights
- Unlimited number of jobs and detectors
- Encoder input

Optical data		Functions	
Resolution	1280 x 1024 pixels	Number of jobs / detectors	max. 255 / max. 255
CMOS	1/1.8", colour	Detectors	Contour, pattern comparison, contrast
Integrated lens, focal length	12 mm, adjustable focal position		brightness, grey level, colour value,
Adjustment range	30 mm to infinity		colour area, colour list
Integrated illumination	White LEDs	Properties	Position tracking: X/Y and orientation
Minimum field of view, X xY	16 × 13 mm ²		pattern comparison / contour: teach-in and detection of patterns and contours; grey threshold, brightness: evaluation of brightness; contrast: evaluation of contrast; colour area: two-dimensional colour inspection with adustable tolerance; colour list: finding the most similar colours
		Typical cycle times ²	Typ. 30 ms pattern comparison; typ. 60 m contour; typ. 2 ms brightness; typ. 2 ms contrast; typ. 2 ms grey threshold; typ. 2 ms colour value; typ. 30 ms colour area; typ. 2 ms colour list

Adjustment range	6 mm to infinity	T	area, colour list
Integrated illumination	White LEDs	Properties	Position tracking: X/Y and orientation; pattern comparison / contour:
Minimum field of view, X xY	5 × 4 mm ²		teach-in and detection of patterns and contours; grey threshold, brightness: eva luation of brightness; contrast: evaluation of contrast; colour area: two-dimensional colour inspection with adustable tolerance; colour list: finding the most similar colours
		Typical cycle times	Typ. 30 ms pattern comparison; typ. 60 ms contour; typ. 2 ms brightness; typ. 2 ms contrast; typ. 2 ms grey threshold; typ. 2 ms colour value; typ. 30 ms colour area typ. 2 ms colour list
Electrical data		Mechanical data	
Operating voltage, +U _B	18 26.4V DC ¹	Dimensions	65 x 45 x 45 mm³ (without plug)
Current consumption	≤ 120 mA	Enclosure rating	IP 67
(without illumination and I/O)		Material, housing	Aluminium, plastic
Current consumption (without I/O)	≤ 200 mA	Material, front screen	Plastic
Protective circuits	Reverse-polarity protection, $U_{\scriptscriptstyle B}$ /	Ambient temperature: operation	0 +50 °C²
	short-circuit protection of all outputs	Ambient temperature: storage	-20 +60 °C²
Power On Delay	Approx. 13 s after Power on	Weight	Approx. 160 g
Outputs	PNP / NPN (switchable)	Plug connections	Supply and I/O M12, 12-pin
Max. output current (per output)	50 mA, 100 mA (pin 12)		Ethernet M12, 4-pin
Inputs	PNP/NPN High $> U_B - 1 \text{ V, Low} < 3 \text{ V}$	Vibration and impact resistance	Data M12, 5-pin
Input resistance	> 20 kOhm	vioration and impact resistance	EN 60947-5-2
Encoder input Interfaces	High > 4V	_	
Inputs/outputs	Ethernet (LAN), RS422, RS232, EtherNet/IP 2 inputs, 4 outputs,	_	

 $^{^{1}}$ Max, ripple \leq 5 $\rm V_{SS}$ $\,$ 2 80 % air humidity, non-condensing

Advanced vision sensor for object detection, colour, 12 mm

- Object detection in colour
- Reliable detection of very slight colour nuances or self-illuminating components
- · Powerful part finding and tracking
- User-friendly configuration and viewer software with hierarchical user rights
- Unlimited number of jobs and detectors
- Encoder input

Optical data		Functions	
Resolution	736 x 480 pixels	Number of jobs / detectors	max. 255 / max. 255
CMOS	1/3", colour	Detectors	Contour, pattern comparison, contrast
Integrated lens, focal length	12 mm, adjustable focal position		brightness, grey level, colour value,
Adjustment range	30 mm to infinity		colour area, colour list
Integrated illumination	White LEDs	Properties	Position tracking: X/Y and orientation;
Minimum field of view, X xY	8 x 6 mm ²		pattern comparison / contour: teach-in and detection of patterns and contours; grey threshold, brightness: evaluation of brightness; contrast: evaluation of contrast; colour area: two-dimensional colour inspection wi adustable tolerance; colour list: finding the most similar colours
		Typical cycle times	Typ. 30 ms pattern comparison; typ. 60 m contour; typ. 2 ms brightness; typ. 2 ms contrast; typ. 2 ms grey threshold; typ. 2 ms colour value; typ. 30 ms colour area; typ. 2 ms colour list
