

Safety wooden duckboards

health-promoting

reduced loss of working hours
and fewer accidents at work

Provides a secure footing and
is non-slip

enhances the workplace

elastic and comfortable

insulating, can be rolled up

recommended by health insu-
rance schemes, trade associa-
tions and labour inspectorates

Standing healthy and safely

The safety wooden duckboards from LÖW ensures a reliable protective cover for high-grade industrial floors, especially in front of metal-cutting machinery. Ideal uses are in front of:

- Machine tools
- Work benches
- Packing tables
- Assembly lines etc.

The safety wooden duckboards from LÖW insulate the operator both thermally and statically (electrical resistance $3 \times 10^4 \Omega$).

Increased productivity and
more satisfied members of
staff through safety wooden
duckboards!

Workplace ergonomics
You should insist on it

Permanently robust

The safety wooden duckboards are made from kiln-dried beech wood, mounted on elastic rubber sections. Galvanised, plastic-covered, pre-stressed steel wires guarantee the inner rigidity and durability of the safety wooden duckboard. Quality »Made in Germany«.

Easy cleaning

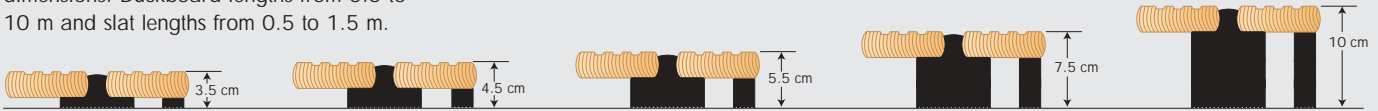

Protection from hazardous shavings

Protects floor and shoes from sharp-edged or hot shavings.

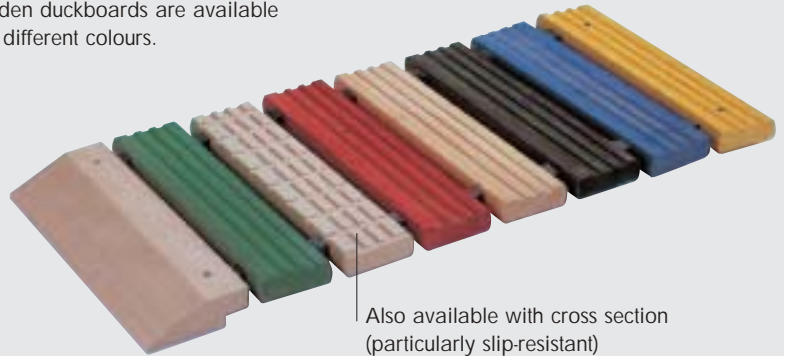

Dimensions and most common design variants

Safety wooden duckboards with different board heights. Our safety wooden duckboards are available in the following standard dimensions: Duckboard lengths from 0.5 to 10 m and slat lengths from 0.5 to 1.5 m.

Colourful support

All safety wooden duckboards are available in a variety of different colours.

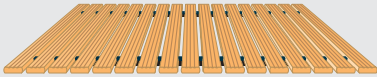

Also available with cross section (particularly slip-resistant)

Versions (examples)

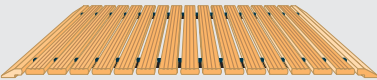

Version B

Standard version without access ramps with four end rubbers.

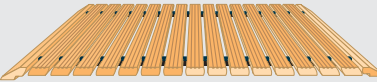

Version D

Access ramp left and right, without end rubbers.

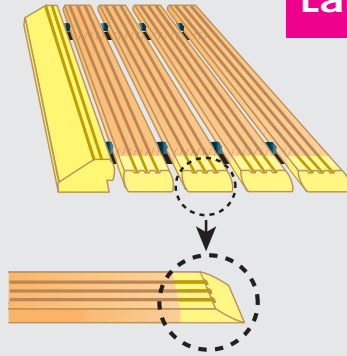

Version F

Access ramp left and right, chamfered front, without end rubbers.

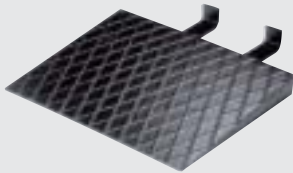

Labelled access ramp

All safety wooden duckboards can be equipped with a yellow stripe on one or more access ramps.

Access ramps

← 24 cm →

Connecting elements

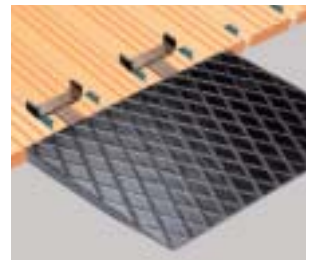

For widening

For lengthening

For access ramps

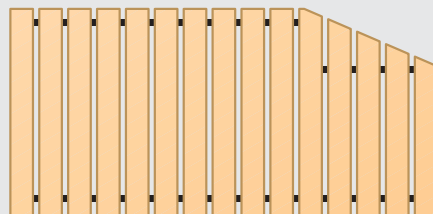

Special dimensions

Special dimensions are our speciality. We build machine platforms according to your specification.

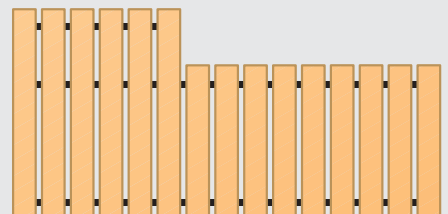

Our comprehensive manufacturing programme is complemented in an appropriate practical manner by recesses, bevels, various colours and platforms of all shapes.

Duckboards, which may be rolled up, for oil sumps etc., can also be manufactured at short notice.
